Personal Skill

- ❖ Comprehensive problem solving abilities.
- ❖ Likes to accept new challenges and implement innovative ideas.
- ❖ Capable of working in team or individually and take up responsibility.
- ❖ Positive attitude.

Project Work

Title : Smart Bike

Description

Conventionally in order to select the transmission operating mode, the driver moves a selection lever located either on the steering column or on the floor. In order to select modes, or to manually select specific gear ratios, the driver must pull the handle (only on column mounted shifters). Button operated gear shifting is semi- automatic transmission system. As the name signifies that there is button operated gear shifting it contains 6 solenoids for shifting the gears which eliminates the gear lever.

For shifting the gears buttons are provided on the steering wheel with indication of gear number. The neutral position is set by full pressing the clutch pedal. A 12 volt battery supply is given to the solenoids for actuation. Whenever we have to shift the gears just press clutch pedal to its extreme position and during releasing clutch pedal press the desired gear number button which is to be shifted.

Personal Details

Name : Hemant Padmaraj Dongare
Age & DOB : 25 years, 06-12-1990
Sex : Male.
Nationality : Indian.
Permanent Address : A/P-Sadwali(Adinath Nagar),
