## PROJECTS:

- **Degree Project:**

**Title:** Design and Fabrication of SEGWAY.

**Description:** A Segway is a vertical, mobile, self balancing vehicle that is able to carry a single person between distances. While a bicycle consists of two wheels and a horizontal frame, a Segway consists of two or four wheels and a vertical frame. Segway run on purely electrical energy and can be taken anywhere pedestrians can go. We made three wheel segway which can travel 70-80Km with speed 20km/hr on single full charging.
